

A photograph of a woman and a young girl in a garden. The woman, on the left, is crouching and looking down at a small green plant. The girl, on the right, is also crouching and holding a similar plant. They are in a garden bed with dark soil and several other small plants. The background is a lush green garden with many plants and trees, slightly out of focus. The lighting is bright, suggesting a sunny day.

NEW FOR 2016

X-Series

Every axe worker knows it. The faster you swing, the more power you deliver. That's why we've developed a brand new, patent-pending structural grip. Our 3D grip provides you with incredible control, meaning you can focus on swinging rather than holding.

PowerGearX

Next generation PowerGear X series combines the best of Fiskars existing technology and new innovations. Market leading performance. Ultra durable yet light weight. Effortless to use.

Light Series

Gardening has just become more rewarding. The lightweight Fiskars Light products are suitable for home gardeners of all ages and sizes.

Weedpullers

Thanks to Fiskars Weedpullers, you can wave goodbye to digging, bending and herbicides.

X-Series axes

Fiskars next generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

KEY BENEFITS

- ✓ 35 degree convex cutting bevel angle for splitting axes - the convex shape strengthens the edge to make it less sensitive to fracture
- ✓ Perfect balance between head and shaft for the most safe, comfortable and efficient swing
- ✓ Ultralight and durable FiberComp™ shaft minimizes fatigue and makes the axe virtually unbreakable
- ✓ Optimal anti-shock surface structure ensures a comfortable, firm grip
- ✓ Hooked end of the handle prevents the axe from slipping out of the hand
- ✓ Comes with a plastic sheath for easy carrying and storage

Chopping vs. splitting

Chopping axes

Fiskars next generation chopping axes serve all manner of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand.

The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

Convenient portability

Choose the right size for you

1. LENGTH TEST

Grab the axe on the shaft below the blade. Turn the shaft towards your armpit and if the end of the shaft reaches the armpit the axe is too long

2. WEIGHT TEST

Grab the axe at the end of the shaft and let the head rest towards the ground. Lift the head up with a wrist turn close to your body as pivotal point (axe is vertically in your hand at the end of the movement) If you can't lift the axe this way, the axe is too heavy.

Increased durability and stable cut due to anvil blade configuration

Anvil or bypass?

BYPASS

Both blade and counter blade press into the wood to make a clean cut with less compression damage (cutting blade bypasses counter blade in a scissors-like action). Possible to cut close to the stem. Best suitable for fresh wood.

ANVIL

Upper blade is forced through the wood with greater pressure as the anvil blade supports the branch and spreads the pressure until the cut is complete. Best suitable for dry or dead wood.

AXES AND SAWS

The saw is particularly suited for removing thick (over Ø 5 cm) branches.

An axe is good for cutting the thickest branches and splitting firewood.

Fiskars has been a part of the evolution of tools since 1649. Our scissors have cut millions of meters of fabrics. Our axes have worked millions of trunks. Our knives have cut millions of slices of bread. Our pans have fried millions of carefully marinated steaks – all with a superior outcome.
